

Leibovitz's L-15 Medium, w/o L-Glutamine LTLM-B15

General Information

Leibovitz's L-15 Medium was originally formulated for use in CO₂-free systems and therefore does not contain sodium bicarbonate. Instead, the medium is buffered by salts, freebase amino acids and galactose substituted for glucose to help maintain physiological pH control.

Leibovitz L-15 Medium support existing cell lines, such as HEp-2 and LLC-MK2, as well as primary embryonic and primary human tissue.

Reconstitution: Usually the medium is supplemented with 0.3 g/l L-glutamine (2 mM).
